

# Online Safety

## Students using Omegle

### [Safeguarding ALERT - Dangerous Chat Rooms - Ineqe Safeguarding Group](#)

The school would ask that all parents / carers find out about this 18+ online platform. Young people are at serious risk of harm if they use it. **There are currently fake appeals to young people on Tik Tok enticing young people to go into Omegle to get free Apple products. This is a scam.**

Please watch the video here and read about the safety tips for parents. Students at this school have used this site which is a concern. Find out if your daughter is using this site and do contact the school if you need more information or support.

Omegle is a website that pairs random strangers for live text or video chats. It first launched in 2009 and its slogan is "Talk to strangers!" There is an option for adult (18+) content and a section for people aged 13+ with parental permission. Anyone can use the site. Users simply go to Omegle.com and then choose 'Text' or 'Video' chat and the page states how many users are currently online. Depending on the time of day this can be hundreds of thousands. Omegle markets itself as a great way to meet new friends however has been known to feature pornography and inappropriate content within chats, so it's important parents are aware of the risks associated with the site.

What parents need to know about

# OMEGLE

## NO AGE VERIFICATION MEASURES

Omegle is completely free to use and allows users to communicate with others without the need to register, supply an email address or create a profile. This means users can remain anonymous and it's hard to trust who your children are talking to. Furthermore, there are no age verification measures and other than agreeing to the terms and conditions, your child can easily start online engagement with strangers and potentially access more adult themed content.

## RISK OF CYBERBULLYING

The anonymity of Omegle can increase the risk of cyberbullying on the site. Engaging in chat with strangers means that topics of conversation can lead almost anywhere including discussions about looks, body image or the sharing of other personal information. With the availability of video chat as well, this could lead to children being coerced or forced into carrying out activities online which could then be used against them.

## UNMODERATED CHAT

Omegle encourages video chat as much as it can, prompting users during their text chat to activate their web cam. Whilst text chat has a degree of moderation, the content in Omegle's video chat rooms is not moderated by administrators and, at any time of the day, there can be thousands of users online. This means that your child could easily come across illegal, unacceptable or inappropriate images or media. Omegle currently offers no function for reporting online abuse or inappropriate behaviour on its site and instead only offers advice to 'please be careful'. It also advises to 'Use Omegle at your own peril. Disconnect if anyone makes you feel uncomfortable.'

## PRIVACY RISK VIA FACEBOOK

Omegle can be linked to a user's Facebook account to match their interests and likes with other users. This means that Omegle can access your child's basic Facebook information, and Facebook friends may potentially view Omegle activity. In addition, users can save the chat log and share the link without the other user's knowledge. It is not uncommon then for users to request being added to Snapchat, Instagram or WhatsApp for further interaction, moving the conversation into a more personal setting.

## RISK OF EXPLOITATION

Omegle chat picks another user at random and there is very little way of verifying who your child may be chatting to. This can lead to a number of risks including catfishing (users pretending to be of similar age), identity theft (users eliciting information to commit fraud) and sexual/psychological grooming (users coercing others to act in a way or do something they wouldn't normally do).

## ADULT THEMED CONTENT

Unfortunately, Omegle is infamous for its pornographic content and it is not uncommon for users to expose themselves or engage in sexual acts. If a user selects video chat, then the other user's webcam will automatically be switched on before the action to 'end chat' can be selected. There is also no 'preview' in smaller thumbnail windows. As video chat is so easy to access, it means that unintentionally viewing more mature, inappropriate or even illegal images can't always be avoided.
